A MAN'S STORE

"Pomeroy Bros."

Men like to trade here—because they find here what they want—they find it displayed in a big liberal assortment—they find the labels of reputable makers on every article—and they're served by salesmen who don't coax, cajole, or argue. That's the kind of a store a man likes.

We have the exclusive Hirsch Wickwire agency for the county. Best clothes ever made. Handsome new styles at \$15 to \$40. Manhattan Shirts are one of our strong leaders. They sell at \$1.50 to \$3.50. Other good shirts at \$1.00.

If you're an admirer of good-looking neckties see our 50c, 75c, and \$1.00 lines.

We also have all that's good in Hosiery, Hats, Underwear, Etc.

Bread tickets at Kelley's. Six for 25c. Ed. Barker is the proud possessor of a new Flanders car.

Miss Emma Beattie is able to be at the store again after a short illness.

You'll laugh and grow fat. At what? "The Old Maids' Association".

W. D. Sturtevant & Co. has received several cars of lumber for its yard.

Mrs. Mabel Henry went to Centerville Monday to take charge of a patient.

Don't forget to come out and laugh at the Old Maids, Friday night, June 7.

Mr. and Mrs. Masnet were in Campbell last Sunday, calling on the Inmans.

Mrs. Geo. B. Blanchard was the guest of her son, Dr. Blanchard, the first of the week.

Dr. Wells arrived Tuesday for an extended visit at the home of her cousin, Dr. Cooper.

For Sale Cheap—A good second hand baby carriage. Phone 27 L.

Mrs. E. C. Merrill.

G. C. Archibald left Monday for Reno, to resume his duties, not to start divorce proceedings.

Gentlemen, The old maids are looking for you. Call Friday night, June 7 at the Coffee Club.

Have you seen the U. S. Army line of shoes? See ad. in this issue. The Campbell Shoe Store.

Mr. A. W. Hutchins and wife visited and took dinner with Mr. and Mrs. Inman on Sunday last.

A. B. Chamberlin began work today in the repair department of the Bean Spray Pump Co. in San Jose.

The work of putting in concrete curb-stone and gutters was begun today between Central and First Avenues.

Mrs. Albertine Grandall Layton's musical program is a leading feature at the "Old Maids' Association".

Mrs. M. Messerschmidt, of San Jose was visiting her daughter, Mrs. Sawyer from Wednesday until Saturday.

For Sale—A shingle bungalow, four rooms and bath. Price reasonable.

P. T. Dodson, Owner, Sunnyside Ave.

Come out and hear the folk songs, in costume, by Misses Owens and Layman, at the Coffee Club, Friday night, June 7.

A number of the local veterans and their friends went to Los Gatos yesterday to attend the annual Memorial services.

Mrs. A. G. Williams and grandson, Worthin Catton of Colorado went to Capitola yesterday to visit Grandma Atkinson.

Mr. W. H. Donaldson of Biggs, Cal., sent his parents two nice boxes of cherries by Wells Fargo Express the first of the week.

John Preston has sold his 5-acre ranch on Lee Avenue, east of town but will live there till fall. He may move into Campbell later.

Mr. N. J. Johnson of Ames, Nebraska, a nephew of Mrs. Wm. Donaldson, spent the week end at their home on Sunnyside.

The Junior Society of the Congregational church held a very pleasant social time and luncheon at the church parlors Friday evening.

Mr. and Mrs. Easton Carter were here from Palo Alto visiting during the absence of Mrs. Carter's parents, Mr. and Mrs. J. F. Duncan.

Miss Cora Rodeck who has just finished a successful term of school teaching at Orosi, returned home Saturday for the summer vacation.

Miss Minnie Atkinson of Capitola spent the week end here with her brother, Rev. Atkinson and family. On her return she was accompanied by her nephew, Bryce.

Mrs. H. V. Archibald is suffering from a serious accident sustained Saturday afternoon. While in San Jose on business she fell on a step and badly sprained both ankles and bruised her shoulder.

The work of grading and packing the road-bed of the El Camfiro Real is being continued west of town, between here and Los Gatos. One mile of the work north of Campbell avenue has been finished.

J. D. Sawyer was at Richmond last week in the interests of the Fraternal Aid and expects to be at Saratoga most of next month. Mr. Sawyer said that Richmond is enjoying the biggest boom in its history.

Rev. A. J. Hanson who has been supplying at the Methodist Episcopal church during the absence of the pastor has gone to Oakland to take up his duties. Rev. and Mrs. Wilson who have been in the "East" enjoying a month's vacation, returned yesterday.

Mr. and Mrs. Jas. Fabinger went to San Francisco Wednesday to attend the graduating exercises which marked the completion of the nurses course at the Central Hospital by their daughter, Vera. Miss Fabinger will remain at the hospital for a while.

OFF TO MT. HAMILTON

A party of young people including Misses Lois Bohnett, Pearl Townsend, Mabel Oliver, Matie and Merna Sawyer, and Messrs. Floyd Bohnett, Carl Schulz, Bert Campbell and George Lee started yesterday on a camping trip to Mt. Hamilton. They are being chaperoned by Miss Tracy Schulz.

Miss Catton of the faculty chaperoned a party of the Seniors of the C. U. H. S. on a trip today to the same place. Those going are Lois Pendleton, Helen Hoag, Belle Burdick, Ethel Curry, Clark Waterhouse, Lawrence Hawkinson, Howard Bean, Gilbert Newcomb, Loyd Gardner, Frank Harris, and Will O'Neil. Both parties will visit the Lick Observatory Saturday night and return Sunday. It will be a delightful and profitable outing.

APROPOS LOCAL OPTION

Let every voter be at the polls on next Friday, June 7, and vote No to keep Santa Clara County dry.

Remember, your vote may be the one that will decide the issue, and keep the saloons out.

Vote! The responsibility is yours. Vote for a clean county.

Your boy is safe in Campbell. Help keep other mothers' boys safe by voting No on Friday next.

"Woe unto him that putteth his bottle to his neighbor's lips"—also to him that voteth to license such a proceeding.

You appreciate a clean town. How about helping the other fellow clean up? Don't fail to be at the polls off Friday, and vote No.

Dr. A. C. Bane, Supt. of the Anti-Saloon League of this district gave a very comprehensive lecture Wednesday evening at the Coffee Club in the interests of prohibition. The Anti-Saloon League has been very effective in local option work in helping secure dry territory.

The vote that is to take place Friday, June 7 is for the purpose of cleaning up the road houses and saloons that are located in the 4th Supervisorial district outside of Santa Clara, the only incorporated town in the district. This is Mr. John Roll's district and comprises the most densely populated section of the county. Make it dry.

San Diego Exposition

Declaring that the world has had a surfeit of "commercial" exhibitions and that such do no good, Gifford Pinchot, of conservation fame, put his stamp of approval on San Diego's plan to hold an "educational" exposition in 1915.

Mr. Pinchot was taken over the grounds, past the nurseries filled with millions of ferns, plants and flowers and through the forest of 50,000 growing trees, which will form a background for the scenic attractions of the exposition. Anything growing in the soil appeals to Mr. Pinchot; his towering frame of six feet two will bow in homage to a tiny fern or a delicate plant.

"I am amazed at the magnitude and splendor of your exposition," said Mr. Pinchot, "and I am all the more delighted now that I hear it is to be in the truest sense a 'conservation' exposition, teaching, among other subjects, the latest methods of irrigation—of intense interest to Southern California, the Southwest and in fact to the entire world."

"The San Diego exposition will be of inestimable value in showing a process rather than a product, because it thus can teach the world the best way to obtain the good the world has in store for us. I stand ready to lend all aid in my power to your great project."

San Diego's exposition will be international in its scope. The board of directors has extended an invitation to the governor of every state in the union and to every foreign ruler, requesting participation.

Let Golden West Cleaning and Dyeing Co. do your work for you. Putnam's are their agents in Campbell.

Men Wanted—Widowers and bachelors preferred. Apply at the Coffee Club, Friday evening, June 7, at 8 o'clock.

The Congregational Sunday School will hold its postponed picnic tomorrow, June 1st. Take the 9:28 car to secure rates.

Roy Thompson of U. S. S. Yorktown came home yesterday for a few days' visit with his parents, Mr. and Mrs. D. S. Thompson.

Chester Chamberlin is celebrating his birthday today by entertaining a party of playmates. He is eight years old today and "big for his size".

The Juniors of the Normal at San Jose, residing in Campbell and Los Gatos, vicinities gave an informal dance at the I. O. O. F. Hall, Wednesday evening in honor of the Seniors. About fifty enjoyed a pleasant time.

Headache?

Take Bromo-Seltzer. A piece of sheet music with each 25c bottle. Campbell Drug Store.

O. N. Bagwill Deceased

O. N. Bagwill was born in Illinois on March 14, 1837, and died at Morgan Hill, Saturday noon. Mr. Bagwill was a former resident of Campbell for a number of years having built and owned the Cook house near Mr. Williams' on Harrison Avenue. He was a good man, who was honored and loved for his qualities as a true citizen and neighbor.

Mr. and Mrs. A. G. Williams and I attended the funeral Sunday at his home in Morgan Hill. Our friend and neighbor is survived by his wife, a son and daughter, all at Morgan Hill. The sympathy of their friends is extended the bereaved ones.

I. PRESTON.

Mr. Voter, Just a Minute!

What about this insistent claim on the part of the liquor men that local option increases the consumption of liquor? That claim has been made for years and brewers and liquor men continue to repeat it. If it is true what about the statement going the rounds in the papers recently to the effect that one of the big wholesale liquor-dealers in Louisville has gone into bankruptcy, giving as the reason for his failure the ever-widening area of local option territory?

The saloon lives upon the skulls of boys. Every fourth home must give to its support one of its boys. Mr. Voter, "What's your number?" 1, 2, 3, or 4? Which one of your boys will you vote to the saloon June 7th? If your individual vote would decide the question next Friday for the saloon would YOU after a careful consideration, be willing to become responsible for the results which always follow the saloon's opening? The result may hinge on ONE vote, and that YOUR vote. Do YOU see YOUR tremendous responsibility? VOTE NO, and vote DRY.

A SUBSCRIBER.

"OLD MAIDS' ASSOCIATION"—REPEATED AT THE COFFEE CLUB

Benefit of the Coffee Club, Friday Evening, June 7 at 8 o'clock

Part I. Musical Program given by Mrs. Albertine Grandall Layton and two promising pupils, Miss Sadie Owens and Miss Viola Layman, who will sing the songs of other lands dressed in the national costumes.

Part II. The club for the Promotion of Happy Homes for Widowers and Bachelors.

This is Leap Year Now's our chance! "While there's a man there's hope."

Part III. We've been through the mill.

Young and happy once more, through the efforts of Prof. Makenzieux.

Music! Dancing! Humor! Pathos!

Christian Science Services

In Odd Fellows' Hall, every Sunday morning at 11 o'clock. Subject for June 2—Ancient and Modern Necromancy, alias Mesmerism and Hypnotism, Dehoined. Sunday School at 12:15. The public is cordially invited.

Small Acreage Tracts

Finest fruit and alfalfa land in rich San Joaquin Valley, on railroad, near new town. Sandy loam soil. Low prices. Easy terms. Big advance certain.

Also exclusive agents for famous Faber 5 and 10 acre tracts adjoining City of Palo Alto. Write immediately for full information.

Marshall Black Investment Co.
Palo Alto, Cal.

In the Superior Court of the State of California, in and for the County of Santa Clara, in the Matter of the Estate of Annie M. Isaacs, deceased.

Notice of Administrator's Sale of Real Estate at Private Sale.

Notice is hereby given, that pursuant to an order of the above entitled Court, made, given and entered on the 28th day of May, A. D. 1912, in the matter of the estate of Annie M. Isaacs, deceased, I, the undersigned, administrator of said estate, will sell, at private sale to the highest bidder, upon the terms and conditions hereinafter mentioned and subject to confirmation by said Court, on or after the 11th day of June, 1912, all of the right, title, and interest and estate of said Annie M. Isaacs, deceased, at the time of her death, which was and is ownership in fee simple of the real property hereinafter described, and all of the right, title, and interest that said estate has by operation of law, or otherwise, acquired in or to that certain lot, piece or parcel of land, situate, lying and being in the City of San Jose, County of Santa Clara, State of California, and more particularly described as follows, to wit: Lot No. Eight (8) in Block Six (6) in E. Devine's Survey No. 1, in the City of San Jose, County of Santa Clara, State of California, according to a map of said survey of record in Book "A" of Maps, at page 44, in the office of the County Recorder of said Santa Clara County.

The said real property will be sold on the following terms and conditions, to wit: Cash in Gold Coin of the United States, ten (10%) per cent of the purchase price to be paid at the time of sale, the balance on confirmation of the sale.

Said sale to be made subject to the usual custom and course and practice in regard to sales and purchase of real estate as to abstract, payment of state and county taxes and assessments of whatever kind or nature, which are now or may hereafter become chargeable to or a lien against the property purchased by any such purchaser.

All bids or offers must be in writing and may be left at the office of L. D. Bohnett, attorney for said administrator, at 314 Bank of San Jose Building, in the City of San Jose, County of Santa Clara, State of California, or may be delivered to such administrator personally at his residence No. 1000 Harrison Avenue, San Jose, California, at any time after the first publication of this notice and before the making of said sale.

Dated this 28th day of May, A. D. 1912.

L. D. BOHNETT, Attorney for said Administrator.

Responsibility

To The Public:

Responsible banking is the policy under which this institution has been managed since the first day the doors were opened.

That this policy is appreciated is indicated by the constant and gratifying growth in business.

It is the desire of the officers of this bank to continue adding new accounts of those individuals desiring the most efficient service and responsible banking.

On our record of responsibility your patronage is invited.

Yours very truly,

Bank of Campbell

HERMAN'S U. S. ARMY SERVICE BLUCHER

In Tan Willow Calf or Gun Metal. A hand-some, snappy shoe on the Orthopedic last, designed by army surgeons. You never saw a shoe like it for wear, comfort and style.

Single sole of Texas un-scoured oak, box toe, sole leather counters, every part inspected. Lining of specially tested drill. A solid leather shoe that will give the wear of the civilian shoe that sells for \$8. This is one of the shoes Uncle Sam buys for his soldiers. IT'S A WORLD BEATER. See the Army line: A T

OPERATION SAVED MIND

MAN LEARNS NAME AFTER FOUR TEEN BLANK YEARS.

Condition Due to Attack of Toughe and Being Shanghaied—Recovering Memory of Former Days, He Forgets Former Life.

New York.—S. Chandler Rogers, who was beaten by toughs, thrown into the Hudson river and shanghaied by a British sailing ship on the night of May 10, 1897, and who spent the next fourteen years of his life without the slightest recollection of whom he was or what he had done before he was injured, came here from Seattle the other day to search for his sister. His mind was cleared last October after surgeons in Seattle had removed a fragment of bone that was pressing on his brain.

Rogers, who is now thirty-one years old, told his story to a reporter.

"My principal business in life," he said, "now is to find the sister that I haven't seen for nearly 15 years. I have reason to believe that she is in Bridgeport, Ct., and I am going there tomorrow. Mrs. Michael Roy, who lives in Bridgeport, has identified, I am told, a photograph of me as that of her brother. Maybe she is mistaken, but I hope not."

"After I was operated on in Seattle everything I had been doing for fourteen years was wiped out and I remembered who I was and what I had been doing before I was hurt in this city at Eighth avenue and Sixteenth street. I remembered that my right name was S. Chandler Rogers and that my home was in New York, although they told me at the Seattle hospital that I had been known as George Kelly for many years."

"I was a newsboy in New York and later a messenger boy. Once in a while I got a chance to box in the streets and made a little money. On May 1, 1897, I got a day off from my work and that evening with a friend and two girls I went to a show. After the show I took my girl home and then started for bed, but at Eighth avenue and Sixteenth street three men stopped me. It was pretty dark and I couldn't see their faces. One of them asked me for a match. I told him I wasn't a match factory, and he made a pass at me. I tried to hit him with brass knuckles I was wearing, but another of the three slugged me with a blackjack."

"When I came to I was trying to keep afloat in the Hudson, swimming desperately and nearly blind from the pain and shock of my hurts. I managed to catch hold of a piece of piling and screamed for help. That's all I recall definitely. I have been told by the doctors that I revealed to them after the operation in Seattle that I was shanghaied that night by a British ship, that I was badly hurt by the mate and that I had all sorts of adventures in the next fourteen years under the name of George Kelly. I suppose they are right, but I can't remember what I did as Kelly."

"There's a young woman out in Seattle who says that I am married to her. If that is true she is in a mean sort of position. She married me as Kelly and I have shed the name and personally of Kelly forever."

Rogers' identity was established by a curious circumstance. As George Kelly he was living last October at Fort Blakely and working in a lumber mill. On the evening of Tuesday, October 10th, Rogers—or Kelly—left home for a trip to Mill Town. He hadn't been feeling well and his wife was worried about him. After ordering groceries at a Fort Blakely store, he disappeared. Three days later he was found naked in a forest near Fort Blakely crawling on his hands and knees and barking at dogs that were annoying him. He was taken to the Providence hospital in Seattle and was the doctors found, unable to speak coherently or to see. On October 15th, the operation was performed, which relieved pressure on his brain, restored the power of speech and the ability to see and which gave him back also his former identity.

HAS A USE FOR OLD MAIDS

John Burns Would Make Unmarried Women Take a Poor Law Child to Board.

London.—Replying to parliamentary critics of his administration of the poor law schools, John Burns, President of the Local Government Board, declared that every old maid in England who owns more than two cats or more than one dog should be compelled to take a child from the poorhouse. He maintained that his policy of removing the children from the poorhouse to the care of private families had proven markedly successful.

Referring to the children who have been boarded out Mr. Burns said: "Increasingly both rich and poor are adopting poor law children. If I had my way I would make it compulsory for all women who keep more than two cats and one dog to have a poor law child on which to divert some of the cash and a good deal of the wasted sentiment which many people put upon animals to an extent which is absurd."

TRANSPLANT DEAD EYE

GRAFTING OF CORNEA RESTORES SIGHT TO FRENCH BOY.

Successful Experiment Marks Epoch in Ocular Surgery—Disease That Distress Some Serve to Give Relief to Others.

Paris.—By slow but sure steps science and human skill are widening the boundaries of the possible, and in the department of beneficent activity is this progress more apparent than in the domain of surgery. Not so long ago the chief aim of operative surgery was the removal of a damaged limb or the extirpation of a malignant growth. Then came what may, without irreverent presumption, be styled creative surgery, when the object was restoration instead of destruction, when skin could be grafted, a severed nerve spliced and even a damaged or useless organ repaired or replaced by a healthy one. It has remained for a clever French ophthalmic surgeon to give back sight to the blind. He has been successful in one case only, but what has been done once can be repeated.

Several months ago Dr. Magitot made the experiment of grafting a human cornea, kept in a state of slackened vitality, upon the eye of a young man whose sight had been practically destroyed by lime. Numerous experiments had been previously made with corneas of animal origin, but they had all failed to give the desired result. Dr. Magitot made his daring attempt—and succeeded.

The transparent cornea of the eye is one of the most delicate of all the organic tissues. Very soon after death it becomes opaque. But by placing it in certain conditions as to "milieu" and temperature scientists have succeeded in preserving it in a healthy condition—that is to say, alive—for several days. This discovery of the possibility of preservation of the cornea is doubtless destined to render incalculable services to suffering humanity.

At the Academy of Sciences Professor Dastre performed the pleasing duty of describing the results of Dr. Magitot's operation. A boy fifteen years old had almost lost sight in one eye in consequence of a burn from hot lime. An opaque film entirely covered the cornea so that it became impossible for the rays of light to make even the faintest impression on the retina.

Seven months ago Dr. Magitot cut a small rectangular "window" in the diseased cornea, and in this he inserted a fragment of transparent tissue, obtained from an unfortunate patient who had lost his sight through another eye disease, that of glaucoma, but whose cornea remained intact. It had, however, to be removed, owing to the pain which it caused him. Thus, what on one hand constituted a relief for one patient became a means of remedying the infirmity of another.

"The adherence of the tissues," said M. Dastre, "was complete in eight days. A transparent window had been placed in the opaque wall. A few weeks later the bandages were removed and the young man was able to see sufficiently to walk about without assistance."

"For seven months this condition of things has persisted, and the sight of the damaged eye has reached one-tenth of the normal, which is enough to enable him to see and move about."

"These facts," M. Dastre continued, "are in accordance with those presented to the Biological Society by the learned French surgeon, Alexis Carrel, of the Rockefeller Institute, of New York, on the possibility of preserving living tissues outside the human organism and afterwards transplanting them on other living organisms. Received with much reserve and amidst general incredulity, these statements have now been, at least, partially confirmed."

MAN BESTS CUNNING WOLF

Montana Hunter, by Clever Ruse, Captures Animal Seven Feet Long.

Bozeman, Mont.—Man's intelligence has won at last against brute cunning with the capture by George W. Brown, a trapper, of a large gray timber wolf, which had been roaming Brown's territory all winter, but which until of late had been too wily to caught. The wolf's pelt is seven feet one inch in length and is more than three feet wide at its widest point. Brown captured the wolf by setting his trap by a rope sling without dismounting from the horse he was riding and without leaving any traces of man in the vicinity.

FOUND A CURE FOR IDIOCY

Prof. Payr Grafts Thyroid Gland From Healthy Child on Liver of an Imbecile.

Leipzig, Germany.—A remarkable operation has just been performed with great success on an imbecile child by Prof. Erwin Payr, director of the surgical clinic attached to the Leipzig university.

The professor planted a piece of the thyroid gland taken from a healthy child born of a healthy mother into the liver of an imbecile child, who immediately afterward began to improve in intelligence, which steadily increased until a complete cure was effected and the patient was discharged from the clinic.

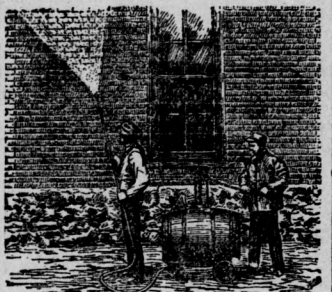

IMPORTANCE OF DISINFECTING AFTER OUTBREAK OF DISEASE

Practice Not Entirely Appreciated by Stockman and Farmer—There is Also Lack of Information Concerning Practical and Economical Methods of Procedure of Cleaning.

(By GEORGE W. POPE.)

It has been found that the average stockman and farmer does not realize the importance of thoroughly disinfecting his premises following an outbreak of contagious disease. There is apparently a widespread lack of information regarding the germicidal power of various substances, commonly termed disinfectants. There is also a lack of knowledge concerning practical and economical methods of proceeding with the work of disinfection. Moreover, the reappearance of a contagious disease on premises from which it was believed to have been eradicated may frequently be traced to careless or imperfect work in connection with the cleaning and disinfection of the place.

It is but natural to acknowledge the presence of only such objects as can be seen with the unaided eye. Science, however, by means of the high-power microscope, has clearly proved the existence of numerous minute animal and vegetable organisms—and it is a matter of common knowledge that many of these organisms fre-

Applying Disinfectant.

quently find their way into the animal body and produce disease. It is also well known that these germs vary in form and other characteristics and that for each disease of an infectious nature there is a specific germ.

If these germs could be confined to the animal body and die with it there would be no such thing as an infectious disease. Unfortunately, however, they are thrown off by the animal through the excretions and lie in the earth, in the litter of stables, upon the floor and walls, and in cracks and crevices. Here they may remain and maintain their virulence for an indefinite period, ready at any time to be gathered up by an animal in its feed or to be blown about in dust and drawn into the lungs.

The work of disinfection is based upon our recognition of the presence of disease germs, and disinfection means the act of destroying the cause of the infection. In other words, disinfection is removal of the cause, and it will be clear to any practical man that in dealing with disease any effort which stops short of a complete removal of the cause is most unwise and unprofitable. To those un-

accustomed to the work, disinfection may seem a most complicated process. Any approved method, however, is comparatively simple when carried out carefully, although like many another procedure it is one in which attention to details counts for much. It is important to bear in mind that the causative agents of many diseases are extremely small and may remain for an indefinite time in dust, cracks, and crevices of buildings, so that efforts aiming at the eradication of disease from contaminated premises must be thorough in order to be effective.

In the work of disinfection nature has provided man with a most valuable ally—sunlight. It is well known that the direct rays of the sun are destructive to many forms of bacteria, in some cases destroying them and in others lessening their influence. Thus the importance of well-lighted stables is evident. The dark and sunless building will be a favorable breeding place for bacteria, and the structure which admits the greatest amount of sunlight will be the least favorable for their development. Again, heat will destroy the bacteria of disease. By this is not meant the ordinary heat of the sun, but heat as developed in boiling water or in flame. It is upon this principle that the surgeon before operating renders his instruments free from the possible presence of bacteria by boiling, and it is heat which renders a jet of live steam destructive to bacteria. Sunlight, however, cannot be considered more than an accessory in the destruction of bacteria, while the application of heat in the form of steam or flame is seldom possible. The result is that in the practical work of disinfection we are dependent upon certain drugs, which have power to destroy the organisms of disease.

Such drugs are known as disinfectants, and, fortunately, we have at hand a number that possess the power of destroying bacteria.

Bichlorid of mercury also known as corrosive sublimate and mercuric chlorid, chlorid of lime, formaldehyde, carbolic acid, crude carbolic acid, cresol, and compound solution of cresol, are such drugs. They have only to be brought in contact with the bacteria in order to destroy them.

Before either of the above are used, however, the farmer should study their peculiar characteristics and use the one best suited to his purpose. Violent poison should not be used unless the user of the disinfectant is familiar with it and its results.

In the practical work of disinfection there are three essentials:

1. A preparation of the building that will facilitate reaching organisms of disease.
2. A disinfectant which upon contact can be depended upon to destroy such organisms.
3. A method of applying the disinfectant that will assure the most thorough contact with the bacteria.

SALT NECESSARY FOR ALL FOWLS

In Order To Guard Against Any Deficiency It Is Well to Feed for Lack of Palatability.

Salt in some quantity is a necessity to the living animal. Some food contains all that is probably needed, but the amount in others is small. In order to guard against any possible deficiency it is well to feed some salt, especially if it increases the palatability of the ration.

Moderate quantities of salt had been fed to poultry with apparent advantage, but the limitations of its use were not known. A feeding trial was therefore made with twelve hens to get some suggestion as to the approximate limit of its safe feeding to mature fowls. For one lot of hens salt was mixed in the food, increasing in amount by periods of feeding. Until it was fed at the rate of .063 ounces per day, per fowl (nearly one-half pint per day for 100 hens) no bad effects were noticed.

With this amount, however, diarrhoea attacked a few of the hens, but the trouble disappeared when the amount of salt in the food was reduced about one-third. When the hens were allowed free access to boxes of coarse barrel salt, not enough was eaten to show any ill effect, either by hens that had been fed salt freely for two months or by those that had been without any for the same time.

Little significance was attached to the egg yield from the old hens fed at an unproductive time of year, but twice as many eggs were obtained from the salt-fed hens as from the others so there was no indication of unfavorable effect in this direction. When reporting the experiment it was suggested that salt at the rate of one ounce per day for 100 matured fowls could be fed without risk. In later feeding it was found that five ounces of salt in every 100 pounds of food was a safe proportion. The station has not advised the feeding of any salt to young chicks or until they are two or three months old.

INCREASING THE YIELD OF GRASS

Among Four Chief Essentials are Smooth Surface, Preparation, Good Seed and Fertility.

(By R. B. RUSHING.)

Farmers who content themselves with two tons or less cannot understand how yields of three or four tons even more are obtained. There are, however, four chief essentials: a smooth surface, with even, steady grade, thorough preparation of the soil, and abundance of good, healthy seed and plenty of fertility and to which might be added the proper amount of moisture.

Where land is stumpy or rocky, it may be considerable expense to remove them, but to obtain the greatest amount of grass it must be done. The rocks must either be sunk or hauled away and the surface smoothed so as to give a gentle grade. A little depression where the water can stand may cause a patch of grass to die out and a few patches will kill a hundred pounds of hay.

After this thorough grading the land is thoroughly fitted. This does not mean just plowed and harrowed in the ordinary way. I prefer the use of a cut-away disc, which does the work just the opposite to the turning plow.

The continued working of the soil with the cut-away clears the soil of foul stuff and gives the new seeding a chance. The soil should be worked over with the cut-away and the smoothing harrow many times, not all at once, but continued through July and August. In this way, when ready to seed the soil is certainly as fine as an ash heap.

The seed then should be put on carefully and accurately, so as to have every square inch of surface covered, thus having two blades of grass where one formerly was.

The question frequently asked is: Why is this large amount of potash necessary? No one who has ever used fertilizers on grass need be told that nitrogen gives the grass a rich, green color and makes it grow very rapidly.

WHO WHO—and Why

ARIZONA SMITH IN CONGRESS

A shout of joy went up all over Washington when it was known that Mark Smith was coming back. For twenty-two years, barring a couple of terms when the Territory of Arizona had the bad taste not to re-elect him, he was one of the landmarks of Washington. And when he took his seat in the senate every member knew it would not take him long to make Arizona a power in that body, for his position in Washington has long been established.

A territorial delegate occupies the position of a small boy, who must be seen and not heard. Mark Smith was the sole exception. He ranked with Amos J. Cummings and Private John A. Allen, and his cloakroom stories were classics. Tall, grizzled, red-faced, with a big gray mustache and a kindly drawl, an unquenchable sense of humor, the delegate was a better-known and more familiar figure than many a senator.

But he was no mere Rialto figure. His ability was everywhere acknowledged and respected, and when the interests of his territory were involved the genial, drawing, story-telling tongue turned into an engine of war. Smith never assumed the deferential attitude which territorial delegates, without a vote and generally without a voice, have to take toward the house. He hearded the then omnipotent speaker and reduced the generally imperturbable Cannon to a palpitating and crimson heap of impotent rage. He was a master of invective, though policy usually obliged him to keep to his role of the John Allen of Arizona.

HEAD OF IMPORTANT DIVISION

Wisconsin's university extension division has two fundamental aims—to create in all the people a realization of their educational need and to satisfy that need. Education by "extension" does not mean that the laboring man is taught Greek and Chaucer, regardless of his individual want. It does not mean that knowledge is ground out to him by a soulless machine, but that he is stimulated to live, in the true sense of the word. Whether the means of that stimulation be vocational or cultural education, the end sought is the same.

In Wisconsin the seemingly impossible task of making the university a personal friend of every one in the state is attempted by means of a well-developed organization, headed by Dr. Louis E. Reber, who has been dean of the extension division since November, 1907, and has demonstrated over and over again his rare executive ability, as well as his broad human sympathy. Men in all walks of life are taking advantage of his instruction.

The correspondence department is the only one that deals primarily with individuals. Therefore it, more than any other, affords concrete examples of the way in which people are being helped to make the best of their abilities. Contrary to popular opinion, this work is, above all else, personal. Prof. William H. Lighty, who is in charge of it, has had years of "settlement" experience that is invaluable to one dealing constantly with all classes and all nationalities of people.

MRS. SUN-YAT-SEN A LEADER

The latest news from China shows that the transition from Imperial to Republican rule is encountering all the shoals and currents which beset such changes. It is fortunate that such men as Yuan Shih-kai and Dr. Sun-Yat-Sen are in a position to lead the nation. The latter's wife is a remarkably intelligent-looking woman. Yuan Shih-kai's action in submitting a list of the boards of ministers has been much criticised in Nankin. According to the terms of the provisional constitution this duty belongs to the premier. Several of the names proposed by Yuan Shih-kai are likely to meet with strong opposition from the assembly. Even China is not without its suffragette problems, for in response to a petition from Chinese women the assembly have adapted a resolution approving the principle of women suffrage but relegating its realization to the background. Trouble is still prevalent in many districts among the unpaid troops. Kiangsi soldiers raided the pay office just recently at Nankin, but were repulsed by Cantonese troops. Two of the mutineers were killed. At several points on the Yangtse from Shanghai westward, where there are large forces, the question of pay is causing dissatisfaction, which the provisional government is unable to appease owing to the hitch in the loan negotiations at Peking.

MAYOR GAYNOR'S NEW HOBBY

Mayor Gaynor and more than a thousand members of the Housewives league, the new organization of market basket progressives, took possession of Washington market the other day and inaugurated the new era by which it is hoped to show the middleman he is deriving an unholy profit and to educate the New York housewife in the domestic science of buying first hand.

The campaign among the housewives has been going on for many weeks, but this gathering marked the first big demonstration that brought to market almost a thousand women who had never been there before and who were treated to a series of surprises in the way of lower prices and choicer cuts.

The entire market was in gala dress and the butchers and green grocers were as spic and span as so many bridegrooms. Every man of them had a bloom in the buttonhole of his linen jacket, was shaved and powdered and pomaded and wore his hundred candle power smile.

For it was really the biggest day in the hundred years since the Washington market was established.

It was a greater day than all other days because the Housewives league—160,000 strong—is establishing a new era for the housewife and sending her out to do her own marketing where foodstuffs are the cheapest and where there is a greater variety to select from.

Mayor Gaynor mingled with the throngs of purchasers, jollying the stall-keepers, asking innumerable questions and enjoying himself in the thorough-going Gaynor method.

Spring-Cleaning

The Human System Needs It.

Mrs. M. Morgan, 411 4th Ave., E. Brainerd, Minn., writes: "I take from one to two bottles of Hood's Sarsaparilla in the spring to purify the blood just as regularly as I do my house-cleaning, and go around light-footed and light-hearted. I believe it is the best blood purifier known." Hood's Sarsaparilla no combines the curative principles of roots, barks and herbs as to raise them to their highest efficiency; hence its unequalled cures. Get it today in usual liquid form or tablets called Sarsatabs.

VAST WEALTH GOES TO WASTE

Annually Hundreds of Thousands of Tons of Sulphuric Acid Are Carried Off by Streams.

One of the most interesting of the byproducts of the coal mine is sulphuric acid. Coal veins contain sulphur, most commonly in chemical combination with iron. The poorer the coal the more sulphur is there. Such compounds, becoming oxidized, form sulphuric acid, great quantities of which in a free state are continually draining from the mines into the rivers.

This sort of thing is going on at such a rate that the amount of sulphuric acid carried away by the streams of the coal region of Pennsylvania in the course of a year has been estimated by the water resources branch of the government geological survey at 970,000 tons—a quantity equal to more than two-thirds of the total sulphuric acid consumed in a twelvemonth in the United States for industrial purposes.

Sulphuric acid has many uses in the arts. Among other things, it is employed to clean iron before the latter is galvanized; likewise in the treatment of sheet iron for making tinware, and the wire for fences and nails. For these and other purposes 75,000 tons of it are consumed annually in and about the city of Pittsburgh.

Mark, then, the pity of the circumstances that, as determined by the government exports, no less than 95,000 tons of sulphuric acid flows in a year past the town of McKeesport, in the Youghiogheny river—that is to say, 20,000 tons more than is utilized industrially in Pittsburgh and its vicinity during the same period.

To put the case otherwise, fully \$1,200,000 worth of sulphuric acid, produced by nature, is carried away every year by one stream in a neighborhood where the same stuff is required for use by thousands of tons in factories. Here is a problem for the industrial chemist to solve—the obvious difficulty in the way being that the solution of acid is so very dilute that attempts to concentrate it would be likely to prove unprofitable.

Incidentally, the acid robs the streams of all their oxygen, kills the fishes, and attacks structures of iron. It literally eats up bridge piers, lock gates, etc., and at the present time is making a lot of trouble in the government canals along the headwaters of the Ohio.

Gives Success.

"This man's to fight, but heaven to give success.—Pope.

Cal's Little "Butters."

One day as my little friend Willie aged four, and I were inspecting some farm animals we happened to see a young calf with very small horns, and Willie exclaimed: "Just look at the cute little butters it has."—Ex change.

Said Much in Little.

"Cy" Warman, the poet and humorist, is credited with the story of an after-dinner speaker who was called on to speak on "The Antiquity of the Microbe." He arose and said, "Adar had 'em," and then sat down.

WHERE TO STOP AND SHOP

In San Francisco and Oakland

REAL ESTATE

LAND near you want to state years ago. You can now buy. BARGAINS. CIRCULARS FREE. J. CLARK, Public Searcher, Sacramento, Calif.

AGENTS WANTED

Live Agents both sexes seeking money selling our household article. Never fails to sell where shown. Address Desk G for full particulars. E. H. DOBSON & CO., San Jose, Calif.

TYPEWRITER SUPPLIES

All makes of typewriters sold, rented and repaired. Smith Premier, \$35.00. New and second-hand Stearns Visible. Country orders solicited. The Typewriter, 225 Montgomery St., San Francisco.

MACHINERY EXPERTS

MODEL AND EXPERIMENTAL WORK. M. F. Schell & Co., moved to 342 Howard St., San Francisco. Manufacturers of patented devices, special machinery, metal articles, dies, tools, gears.

MALE HELP WANTED

Don't work for less money than you earn. You don't have to. You can secure the position you want and ought to have; but you have got to know how. Your success depends upon knowing how. "How to Land the Job I Want" positively tells you how. It will pay you to write for free illustrated folder at once. KIDDER & CO., Willcox Building, Portland, Oregon.

FOR LIQUOR AND DRUG USING

Over a quarter of a century of continuous success. Call or send for printed matter.

PLANTING THE GARDEN EARLY

Where Season Is Late and Rainy Not Advisable to Get Seeds into Ground Too Soon.

It is not always advantageous to plant the garden as early as possible. Under certain conditions nature hastens the growth of late planted seeds so that the difference in time of their ripening will not accord with the difference in plantings. This is particularly the case when the season is late and rainy.

Plant for a succession of the different vegetables. A garden in which most of the planting is done at about the same time will not give as good results as where a period of time elapses between the second, third or fourth plantings of the same vegetables. Particularly is this true of peas, says the Farm and Home. Where a number of different varieties were tried the best results were obtained from one or two varieties planted in succession.

In sweet corn, however, this was not so apparent. It was found best to rely on several varieties as well as successive plantings. If the season was backward or the plantings made unusually early, sweet corn seemed to be very slow in growth. On the other hand, the corn planted later would grow very fast under favorable conditions and almost catch up with the first plantings. To overcome this difficulty it was found advisable to rely on the plantings of different varieties.

PAYS TO RAISE GOOD HORSES

Grade Stallions Cheaper to Use, But Pure Bred Colts Sold for Twice as Much Money.

Fifty-five dollars is good interest for the use of \$7 for a year. And when the feed of a colt for another year is saved the proposition is all the more attractive.

A stock farmer living in the southeast part of the state has been rearing a number of colts every year, using the services of a grade stallion. This horseman wasn't very enthusiastic about paying a larger fee for the service of a pure-bred stallion. He had been using grade and inferior sires with a fair degree of success. He saw no reason for changing.

In the season of 1910 he decided to try a good pure-bred stallion just once, to see if it was worth the difference in the service fees. The second week in this month this stockman held a sale. The three-year-old colts, sired by a grade stallion, sold at an average of \$76. The two-year-old colts, the progeny of another grade sire, brought an average of \$46. The weanling colts, sired by a pure-bred stallion, sold at an average of \$101.

The service fee of the pure-bred stallion was \$15, that of the grade \$8, a difference of \$7. The feed eaten by the older colts was saved, and \$55 more was received for the weanlings than the two-year-olds, and \$25 more than the three-year-olds.

Raising the Colts Properly.

Most of the colts on the farm get a good start the first six months of their lives from the fact that they are allowed to suckle the dams during that time. Early fall provides them with good pasture and possibly they have been receiving some oats or shared part of the feed of the mare.

Such treatment puts them in good shape for the winter, but liberal feeding must be kept up if a strong, well-developed and matured horse is expected. The colt's system required a considerable amount of bone and muscle building material, and this can be had by feeding nitrogenous feeds, such as oats, a little clover hay.

The feeding of corn, so often practiced, is not desirable for the growing colt, but had better be confined to the matured horses. Access to the straw pile will not hurt a growing colt, but it should not be compelled to rely on the straw pile for a livelihood.

Oil for Incubator Lamps.

Incubator manufacturers always recommend purchasing the best kind of oil to use in the incubator lamps, and this is good advice. But sometimes the oil will smoke. A remedy for this is to take a cupful of fine salt and put into each quart of oil. Let it settle for a few days, then pour into the lamp and put in a small piece of gum camphor, letting it remain there. Of course the wick must be properly trimmed, rounded at each side, otherwise the lamp will smoke, no matter what kind of oil you have.

Gentleness With Stock.

The sheep know their master's voice—there is no doubt about that; but it is more important to know what they do when they hear it—whether they flee in fear or come with expectancy.

Sheep, like other animals, are creatures of habit and should always be handled by the same attendant, who should move among them gently and give notice of his approach by speaking to the flock.

Moving Sheep About.

It is the custom in Wyoming for owners of land who rent their fields in the winter to sheepmen, to stipulate in the agreement that the sheep are not to be bedded in one place more than two or three nights, so as to spread the manure.

Superfluous Cockerels.

One vigorous male to each ten hens is sufficient for fertility and any excess is waste of feed and labor. The male can be dispensed with entirely in small flocks that are kept for eggs alone.

OCCUPIES BUT SMALL SPACE

Novel Tray Accessory Is the "Three-in-One" Complete and Inexpensive Outfit.

Something new in nickelware is the "three-in-one" tray accessory. It consists of a tea or coffee pot, cream jug and sugar bowl, each so made that it fits above the other, thus forming a unique whole. It is complete and inexpensive. Often it is hard to arrange a small breakfast or invalid's tray in an inviting fashion without crowding the various pieces of china and silver together. This little nickel device will be found a great help, and give at the same time a novel air to the tray, causing the invalid's eyes to brighten with pleasure.

A nickel or copper plated percolator, to be attached with cord to the gas jet, is something that will be found convenient to use under the tea kettle or chafing dish, thus doing away with the troublesome alcohol lamp, which many nervous women do not care to use.

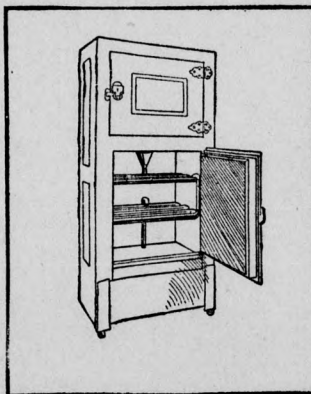

For traveling, too, this gas percolator will be found very handy, as it is often enjoyable to give a "chafing fish supper" in one's own apartments, and with this new device all the annoyance of carrying around or using alcohol is avoided. There is nothing whatever to do but adjust the percolator, put the tube over the gas jet, and light the light.

Nickel-plated vegetable dishes now come on the order of silver ones, only many times less expensive. Some of these are made with divided porcelain dishes inside and a tiny hole, into which the hot water is run to keep the vegetables hot while on the serving table.

MEANS SAVING IN ICE BOX

Refrigerating Pipe Shelves Make Use of Drip From the Cool Regions Above Them.

Forming the food racks of a refrigerator out of a continuous line of piping receiving the drip from the ice compartment is an ingenious means adopted to utilize the cool water from

the melting as an additional cooling element. The shelves are readily installed in any refrigerator, and are easily cleaned by removing and placing them under a water faucet.—Popular Mechanics.

Salad Among Weeds.

Wonder how many people know that there is a common weed growing about their places, and even in their gardens, that makes a delicious dish. The colored people call it poke-salad, but it is merely the ordinary poke weed, the berries of which appear in early autumn. Cook it as you would spinach, first allowing it to soak in cold water for an hour or more. The tough part of the stem should be removed, so that there is little left but the leaves, and it should be picked in the early morning, before the sun is well up and strong and has had a chance to toughen it. For the best results, poke should be gathered before it grows to be much more than a foot high. If cut down it will grow again.

In taste, it is midway between spinach and kale; an eminent physician recently recommended it as a most beneficial spring food.—Harper's Bazar.

Club House Fish Balls.

Boil the required quantity of cod fish in two waters to freshen, and while hot pick it very fine and feathery. Mash hot boiled potatoes thoroughly and cream them with milk and a good sized piece of butter. Three cupfuls of potato to one and one-half cupfuls of fish will be the right proportion, and the mixture should be moistened with a lightly beaten egg. Make into small balls by light handling, roll in flour and drop into smoking hot fat to cook to a golden brown. Drain on brown paper.

Royal Muffins.

Beat three eggs, add one pint of milk, a half teaspoonful of salt, one teaspoonful of sugar, add sufficient flour to take a drop butter—about three cupfuls—into which has been thoroughly sifted two teaspoonfuls of baking powder. Beat hard for one minute, fill the greased muffin cups or pans two-thirds full and bake in a hot oven about twenty minutes.

Molasses Candy.

Two cups sugar, one cup cold water, one large tablespoon molasses, one-fourth teaspoon cream of tartar, butter size of walnut. Do not stir until it boils. When it forms a soft ball in water, pour on buttered tin and when cold enough pull over a book.

WOMAN SICK TWELVE YEARS

Wants Other Women to Know How She Was Finally Restored to Health.

Louisiana, Mo.:—"I think a woman naturally dislikes to make her troubles known to the public, but complete restoration to health means so much to me that I cannot keep from telling mine for the sake of other suffering women."

"I had been sick about twelve years, and had eleven doctors. I had dragging down pains, pains at monthly periods, bilious spells, and was getting worse all the time. I would hardly get over one spell when I would be sick again. No tongue can tell what I suffered from cramps, and at times I could hardly walk. The doctors said I might die at one of those times, but I took Lydia E. Pinkham's Vegetable Compound and got better right away. Your valuable medicine is worth more than mountains of gold to suffering women."

—Mrs. BERTHA MUFF, 503 N. 4th Street, Louisiana, Mo.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

The Dog Misunderstood.

She stuttered, but she was awfully sweet, all the same. She went with him as far as the front door when he left, and said, "George, are you coming round next S-a-s-s—?" It was unfortunate that the dog happened to be lying on the steps and heard her remark, for he chased George half a mile before it occurred to him that possibly his mistress was going to say "Sunday" instead of "seize him."

When Your Eyes Need Care

Try Murine Eye Remedy. No Smarting—Feels Fine—Acts Quickly. Try it for Red, Weak, Watery Eyes and Granulated Eyelids. Illustrated Book in each Package. Murine is compounded by our Oculists—not a "Patent Medicine"—but used in successful Physicians' Practices for many years. Now dedicated to the Public and sold by Druggists at 25c and 50c per bottle. Murine Eye Salve in Aseptic Tubes, 25c and 50c. Murine Eye Remedy Co., Chicago

Municipal Golf Course.

A piece of waste land near Canoe Lake which has long been an eyesore has been leased at a nominal rent by the Ryde Corporation, and Charles Jacobs, the professional to the Royal Isle of Wight Golf club, has been engaged to lay out a miniature nine-hole course, where he and his sons will give lessons.—London Daily Mail

You Can Get Allen's Foot-Ease FREE. Write Allen S. Olmsted, Le Roy, N. Y., for a free sample of Allen's Foot-Ease. It cures sweating, hot, swollen, aching feet. It makes new or tight shoes easy. A certain cure for corns, ingrowing nails and bunions. All druggists sell it. 25c. Don't accept any substitute.

A Short Trip.

"Dibbles started to church last Sunday."

"That was a step in the right direction."

"True, but unfortunately a step was as far as he went."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

New Foes With Old Faces.

This, too, frightens even the daring poet from the theater, that the mob, greater in numbers, though less in wits, untaught, stolid ready to hoof down the gentry if they venture to differ, demand between the lyrics either a dancing bear or a boxing match, for in these the pit finds its chief pleasures. But for that matter the upper classes have nowadays lost their ear for good poetry and have turned to praise vain glads and the delights of the eye.—Horace.

MOST USEFUL RECIPES

PREPARATIONS ON WHICH ONE MAY SURELY RELY.

From Successful Housewives' Own Cookery Books, and the Writer Who Makes Them Public Is a Well-Known Authority.

You will find sure reliance in these recipes with their individual "home" phrases because they are from the successful housewives' own cookery books and the little "lady-like" touches, in the way of combining and flavoring and serving are practical and will please the amateur or the professional.

Scollops in Batter—Have this on Monday, as it may be made from cold beef or roast veal or any sliced cold meat. Cut in half-inch thick slices and brown in hot butter, season with salt and pepper, add all the gravy that was left and thicken with flour rubbed smooth in cold water. Set aside while you make the batter with a cup of flour, two-thirds of a cup of milk, one egg beaten light, a pinch of salt, a heaping teaspoon of yeast powder.

Put the meat and gravy in as many small dishes as you have persons to serve and cover with the batter and bake until browned, or bake in one large dish.

Beef Frizzles—Cut thin dried beef, that has been freshed in cold water into strips with the kitchen scissors and brown in bubbling butter. When it browns a little sprinkle on a tablespoon of flour and stir about with a fork while the flour browns. Pour in a cup and a half of cold milk, continue stirring until thick and smooth; pepper but do not salt. Minced green peppers may be added to this while it is cooking if their flavor is liked.

Corned Beef and Potato Cakes—Chop two cups of cold boiled corned beef in a bowl and season with pepper, add mashed potatoes to equal the amount of meat and one egg beaten, roll into a loaf or shape into cakes and fry brown; serve with young beets dressed with butter fat.

Another way to use the meat and potatoes is to enrich the mashed potatoes with egg and cream and butter and form them into a mound in the center of a platter. Chop the meat, corned beef is excellent for this, and lay it around the meat for a border, sprinkle all with pepper, parsley chopped fine and butter, and grate cheese over the top of the potatoes. Set under the broiler burner until a dark brown and hot through.—Henrietta D. Grauch, Domestic Science Lecturer.

English Brown Soup.

Two tablespoonfuls of butter, three pints of boiling water, two tablespoonfuls sugar, one teaspoonful salt, two tablespoonfuls flour, one teaspoonful of any good extract of beef, one salt spoonful of pepper, one good-sized onion. Rub the butter and flour together, dissolve the beef extract in boiling water. Add it to the butter and flour, and stir until boiling. Put the sugar and onion chopped fine in a sauce pan; shake and stir over a hot fire until they become a dark brown. Then add to the soup, boil and stir for five minutes; add the salt and pepper; strain and serve with croutons.

Cuban Chicken.

Cut up a chicken as for a fricassee. Dry each piece and dip in beaten egg and roll in cracker crumbs, season with pepper and salt, and fry each piece brown in half butter and lard or pork drippings. When well browned add a cup of hot water, cover and simmer half an hour. Then take out chicken and put on dish in warming oven. Have ready a bowl of boiled rice, put it into frying pan with liquid chicken simmered in, add two tomatoes and a Chili pepper chopped fine. Toss all together lightly with a fork, pile in center of platter and lay around it the pieces of fried chicken.

For a Polished Table.

To keep a polished table in good condition it must be rubbed every day with a very soft, dry leather. This is a wonderful polish. I will, of course, suppose that "my lady" uses the little mats of various kinds which are sold to put under the hot plates, otherwise her table will soon be ruined. I must caution against split drops of soda water! These are far worse than wine, and leave a nasty furred mark to mar the polished surface. At the end of the day there will always be found a few incidental marks, and these should be carefully rubbed off before the table is covered up for the night.

Stuffed Tomatoes With Beef.

When you have boiled the beef chop it very fine, then mix it with an equal quantity of potatoes cooked in water, drained and mashed, or mix the beef with an equal quantity of sausage meat. Cut the tomatoes in two, remove the seeds, then fill them up with the hash. Place them in a gratin dish which was previously buttered. Scatter the surface of the tomatoes with small bread crumbs, then moisten with melted butter. Put them in a moderate oven for 35 minutes and serve hot in the gratin dish.

Mustard Sauce.

Chop fine one dozen large apples, one dozen tomatoes and one large onion. Cook them until done, then strain through a sieve. Add one-half gallon vinegar, two cups sugar, one pound mustard and two tablespoons salt. Let it come to a boil again, then bottle and seal.

70 Years with Coughs

We have had seventy years of experience with Ayer's Cherry Pectoral. This makes us have great confidence in it for coughs, colds, bronchitis, weak throats, and weak lungs. We want you to have confidence in it, as well. Ask your own doctor what experience he has had with it. He knows. Keep in close touch with him.

One of Ayer's Pills at bedtime will cause an increased flow of bile and produce a gentle laxative effect the day following. Formula on each box. Show it to your doctor. He will understand at a glance. Dose, one pill at bedtime, just one. Made by the J. C. AYER CO., Lowell, Mass.

He Saw Pompeii Destroyed.

Perhaps the most famous descriptions of the destruction of Pompeii by Vesuvius in the year 79 are the letters of Pliny the Younger. Both he and his uncle, Pliny the Elder, were near Pompeii at the time the city was destroyed, but Pliny the Elder, venturing too close to the scene, was killed. It is only in recent years that this city, which had been buried for centuries, was uncovered by the Italian government. Now the traveler can walk through the old streets of Pompeii.

Automobile Eye Insurance needed after Exposure to Sun, Winds and Dust. Murine Eye Remedy freely applied Affords Reliable Relief. No Smarting—Just Eye Comfort—Try Murine.

Legend of the Niger.

There is a curious legend connected with the source of the Niger. Tradition says that a devil lives inside the rock whence the river springs. The natives are very superstitious, and greatly fear this demon, who is supposed to kill any individual who dares to look at the source. Hence, when showing a stranger the spot, they cover up their faces and walk backward in the direction of the source, pointing toward it with hand outstretched behind the back.—Wide World Magazine.

Try Murine Eye Remedy for Red, Weak, Watery Eyes and Granulated Eyelids. No Smarting—Just Eye Comfort.

Class Distinction.

"Did you see as Jim got ten years penal for stealing that 'oss'?" "Serve 'im right, too. Why didn't 'e buy the 'oss and not pay for 'im like any other gentleman?"—Sketch.

Unkind.

Delivered at Your Door

If you have friends coming to Camp-
bell, tell them I have a nice bungalow
home, well built and up to date, concrete
foundation, in best location, on two lots
120x160, stable and barn, steel fenced,
for \$2000, built for a home, but business
calls me.
G. K. Edwards,
Sunnyside Ave.

Big Apricot Crop

In nearly every orchard of the valley
there has been a big set of apricots. In
some orchards the fruit will have to be
thinned out at a cost of from \$15 to \$20
per acre, by hand. Other methods of
thinning are not so expensive. Nearly
every orchard is protected with fire pots,
and the season for frost danger is about
over.

There is more Catarrh in this section of
the country than all other diseases put
together, and until the last few years was
supposed to be incurable. For a great
many years doctors pronounced it a local
disease and prescribed local remedies,
and by constantly failing to cure with lo-
cal treatment, pronounced it incurable.
Science has proven Catarrh to be a con-
stitutional disease and therefore requires
constitutional treatment. Hall's Catarrh
Cure, manufactured by F. J. Cheney &
Co., Toledo, Ohio, is the only constitu-
tional cure on the market. It is taken in-
ternally in doses from 10 drops to a tea-
spoonful. It acts directly on the blood
and mucous surfaces of the system. They
offer one hundred dollars for any case
it fails to cure. Send for circulars and
testimonials. Address:
F. J. CHEENEY & CO. Toledo, O.
Sold by Druggists, 75c.
Take Hall's Family Pills for consti-
pation.

Be Charitable

EVERY time the closet of your neighbor is opened a little do you
strain your neck to peek, and then afterward strain your tongue in talk-
ing about it? Do you ever stop to think that some day a tragedy may
take up its abode in your home? Can't you get it into your head that
some day the tongue of slander may cut you like a sharp sword and the
whispers of your neighbor be as vinegar on your wounds? Misfortune
and disgrace may have overtaken your neighbor, but it does not be-
come you to get on the housetops and shout it out to the world. You
will not be called upon to pay for nor answer for any of the sins of
your neighbor. You have all you can attend to to pay for your own in-
discretions. Some day one near and dear to you may fall—the prison
walls may open to a son of the scarlet letter of eternity blight a daugh-
ter. When a home is in mourning over a tragedy the best thing you
can do is to keep your mouth shut unless you can say something that
will come as a rift in the clouds. Then again, you know you may be
no better than your neighbor. The only difference is that your neigh-
bor was caught and you, up-to-date, have kept the sunlight away. Be
charitable, my friend, for you know not the day nor the hour when the
blight will appear in your sacred circle.—Author unknown.

BY THE CALAMITIES of elsewhere, we may measure our own
blessings. We have floods in California, sometimes, in some places,
and some of the best land in the state, along the lower reaches of the
Sacramento and San Joaquin rivers, is subject to overflow. In the very
nature of things that must be. There are no floods on top of a mount-
ain, also there is no soil. The soil from the floodless regions is
washed, by floods, to the flooded, and so the best lands either now are
or in former ages were subject to flood. This is true of the lower val-
leys of our California rivers, and it is true of the corresponding parts of
the great Eastern rivers. But there was never a California flood like
these Eastern floods. Our floods do not bring death, devastation and
destitution in their wake. In fact, they range from a minor evil up to a
positive benefit. At their very worst, compared to the Eastern floods,
the victim of a California flood may still exclaim "Blessed California."
—Cal. Outlook.

INDEED, it looks as though California has gone mad; a madness
in which there is no good method.

We did not believe that the Republicans of this state would thus
advertise and declare their ingratitude, but they have. Mr. Roosevelt
has received an enormous endorsement in his overmastering ambition;
President Taft has been repudiated by the people whom he favored
above all others; he has been most unjustly and undeservedly rebuked
and insulted. This experience is unique in the history of the United
States.

But we hold that the principles of the Republican party are greater
than any man, and must be upheld, if our republic shall endure, hence
if the nominating convention of that party shall ratify the nomination of
Mr. Roosevelt, we will give him all of our small measure of support,
freely and sincerely.—Mountain View Register-Leader.

WHO IS THE man that gave San Francisco the Panama-Pacific
Exposition? Certainly not President Taft, for we have a very distinct
recollection that when the fight was on between San Francisco and
New Orleans that the President kept his hands off as between the two
rivals. Then how did any one man, and where is he, that gave San
Francisco the big fair? He does not and never did exist outside of
campaign "flapdoodle." Poor old San Francisco certainly has enough
to answer for without this untruthful accusation, originated to make
political capital, but which failed miserably. The people have not got
as poor memories as some would-be political leaders and teachers im-
agine.—Mountain Echo.

WELL, the question of whom the Republicans of California prefer
for president is settled, and the people can get down to business for a
few weeks. There is a lull due until after the two national conventions
meet when the big noise will begin again to continue without interrup-
tion until November and then—four years of what?—Palo Alto Citizen.

IT is a genuine surprise that San Francisco should have turned
against the man who gave her the Panama-Pacific Exposition.—Senti-
nel.

San Joaquin Valley Fairmead Colony Madera County

- 1 A new tract of nearly 30,000 acres opened for settlement in March.
Where
- 2 The history of the most progressive cities of the valley will be repeated
Where
- 3 You will get the cream of the project if you buy now.
Where
- 4 An acre costs from \$100 to \$120 in 10 and 20 acre tracts. Easy terms.
Is it you or your neighbor who invests wisely in land? Why?
- 5 None are so blind as those who refuse to see their opportunities.

Fine sandy loam **FAIRMEAD** Irrigated lands.

- 7 The land is going at the rate of nearly 200 acres per week.
Where
- 8 An acre produces as much alfalfa and fruit as any acre in the State.
Where
- 9 An acre brings greater returns on your investment.
Where
- 10 An acre increases rapidly in value.
- 11 The produce from land gives a farmer wages. The increase in the value of
his land brings him wealth. Get land that increases in value.

No alkali **FAIRMEAD** No malaria.

- 12 The climate works for you the year round.
Where
- 13 The climate is healthy—elevation 250 feet—air dry—no tuberculosis.
- 14 If you buy land but once buy the best.
- 15 We sell only the best and want only the best farmers to buy.
- 16 The man with money in the bank is like a hen setting on china eggs.
- 17 It is sometimes difficult to get a man to do just what he should do.

Water plentiful **FAIRMEAD** Drainage good.

- 18 You can get in on the ground floor now.
Where
- 19 The land sells itself. You should be influenced by the value of the land—not
by what we do for you.
- 20 The man who puts off buying until tomorrow will talk about what he might
have done and what the other fellow did do.
Where
- 21 The land is in grain. You get one-fourth of the crop if you buy now.
- 22 If you care to get the benefit of all the growth of the county buy now.
We are not satisfied unless our customers are.
